

Ultrasonic panel filter welding system

Cheersonic specializes in ultrasonic welding process, used in filter bag welding, panel filter and so on. As a customizable system that requires the use of ultrasonic welding techniques to handle a large number of pleating filters, it is possible to continuously seal various pleating filters .

Advantages of using ultrasonic welding systems:

1. Needless needle and thread, to avoid the frequent use of needle and thread trouble, sealing performance than the needle high.
2. Seal the edge is not cracked, not burr, not curling, high degree of beauty.
3. Simple operation, short processing time, continuous production.
4. Low cost, fast, to help you efficient production.
